RE: Advisory Opinion Programme Concept

Dear Mr. Kaiser:

In response to the December 14, 2018 Notice to Participants and Stakeholders, ENMAX Corporation (“ENMAX”) provides the following comments on the consultant report for the Advisory Opinion Programme.

The existing MSA approach to interactions with stakeholders is working well and ENMAX welcomes the continued open discussions with MSA management and staff. While we are appreciative of the willingness to innovate new avenues for constructive dialogue, we do not view the notion of an Advisory Opinion Programme as required at this time. In order to ensure a level playing field approach, we prefer MSA advice to market participants be publicly available where possible and we encourage the use of the MSA guideline process.

ENMAX supports open and transparent consultation processes where participants can share their respective views to achieve enhancements for the Alberta electricity market. Thank you for the opportunity to provide our views.

Sincerely,

Mark McGillivray
