

NOTICE TO MARKET PARTICIPANTS AND STAKEHOLDERS

August 20, 2020

Re: COVID-19 compliance update and extension

Further to the MSA's notices dated March 30, 2020¹ and June 22, 2020,² the MSA recognizes the sustained potential for COVID-19 to cause non-compliance with the Alberta Reliability Standards and the ISO rules. Opportunities remain available to request waivers and variances of certain requirements from the AESO³ and the MSA will continue to appropriately exercise its regulatory discretion during this period to assist market participants during this challenging time.

The effects of the COVID-19 pandemic will continue to be considered an acceptable reason on a case-by-case basis for non-compliance with the Alberta Reliability Standards and the ISO rules until December 31, 2020. Self-reports must continue to clearly identify the cause of the non-compliance, the date it was discovered, the date it commenced or will commence, and the steps and timelines for returning to compliance.

Sincerely,

Derek Olmstead
Market Surveillance Administrator
