EVENT DETAILS

On December 17, 2019, at approximately 22:33, the CAL1 asset began to vary its generation from its dispatch by more than its allowable dispatch variance. At approximately 22:43, Calgary Energy Centre No. 2 Inc. submitted an intra-hour MW block restatement, redistributing MW from block 3 to block 4. Information available to the MSA indicates that an available capability restatement could have accommodated the source asset's operating state. Section 203.3 of the ISO rules states, in part:

- 4(1) A pool participant that submits an offer may submit a MW restatement prior to two (2) hours before the start of a settlement interval.
- (2) A pool participant that submits an offer must submit a MW restatement redistributing the MW to represent the operating state of the source asset, as soon as reasonably practicable, if the source asset cannot comply with the current offer as a result of:
- (a) either
 - (i) an acceptable operational reason; or
 - (ii) an operational deviation and such restatement is required under subsection 5(3) of section 203.4 of the ISO rules, *Delivery Requirements for Energy*, and an available capability restatement under subsection 2 cannot reasonably accommodate the source asset's operating state; or
 - (b) carrying out either one (1) or both of commissioning and testing under section 505.3 of the ISO rules, *Coordinating Synchronization, Commissioning, WECC Testing and Ancillary Services Testing* or under section 505.4 of the ISO rules, *Coordinating Operational Testing*.
- (3) A pool participant must submit the reason or reasons for submitting a MW restatement in accordance with subsection 4(2)(a) if such MW restatement is submitted within two (2) hours of the start of the settlement interval or within the current settlement interval.
