MSA FINDINGS

At the start of February 7, 2024, the declared available capability ('AC') of the CYP2 asset was 46 MW for the hours ending ('HE') HE 01 through HE 24. Information available to MSA indicates that the AC of the CYP1 asset was affected throughout each settlement interval between HE 01 on February 7 and HE 08 on February 12; however, an AC restatement was never made. Section 203.3 of the ISO rules states in part:

2(1) A pool participant must only submit an available capability restatement revising the available capability of a source asset if such revision is:

- (a) as a result of an acceptable operational reason;
- (b) in relation to an operational deviation and required under subsection 5(3) of section 203.4 of the ISO rules, Delivery Requirements for Energy; or
- (c) in order to reflect the output of the source asset which is restricted during either one (1) or both of commissioning and testing under section 505.3 of the ISO rules, Coordinating Synchronization, Commissioning, WECC Testing and Ancillary Services Testing or under section 505.4 of the ISO rules, Coordinating Operational Testing.

(2) A pool participant that submits an offer must, if there is a change to the available capability of the source asset as a result of any of the circumstances outlined in subsections 2(1)(a), (b) or (c), submit an available capability restatement revising the available capability for the applicable hours, as soon as reasonably practicable.

(3) A pool participant must submit the reason or reasons for submitting an available capability restatement for a source asset.

The MSA is satisfied that the conduct was a contravention of section 203.3 of the ISO rules.
