Subsection 2, General, of Section 306.5 states, in part:

- (3) A pool participant must submit information required to be provided to the ISO pursuant to this Section 306.5 via the Energy Trading System.

Where planned outage, as defined in the AESO Consolidated Authoritative Document Glossary:

means the unavailability of a facility which is anticipated as part of a legal owner’s regular maintenance and occurs as a result of a deliberate, manual action, including for the purposes of construction, commissioning or testing, and occurs as a result of a deliberate manual action.

At 09:32:42, on April 4, 2024, Cancarb made a submission into the Energy Trading System (ETS) for CCMH for the period of HE8 April 7, 2024 to HE18 April 16, 2024, restating Available Capability to 0 MW with the reason “Planned shutdown for maintenance.” and the designation “Outage – Planned”. Information available to the MSA indicates that Cancarb did not submit planned outage information in accordance with ISO Rule Section 306.5 as soon as reasonably practicable.

The MSA is satisfied that the conduct was a contravention of Section 306.5 of the ISO rules.
