

## NOTICE TO MARKET PARTICIPANTS AND STAKEHOLDERS

August 26, 2024

**RE: Rate of Last Resort implementation by Rural Electrification Associations and municipalities – September 3, 2024, meeting announcement**

---

### BACKGROUND

The Government of Alberta has announced that the Regulated Rate Option will transition to the Rate of Last Resort (RoLR), effective January 1, 2025. The MSA will have a role in advising RoLR providers on the development of associated Energy Price Setting Plans (EPSPs), making determinations about whether the EPSPs are fair, efficient, and openly competitive, and monitoring the profitability of RoLR rates following the implementation of EPSPs.

### MEETINGS

To foster common understanding about the forthcoming changes, the MSA will host regular meetings to provide information updates and to answer questions from Rural Electrification Associations and municipalities and their RoLR providers. The first meeting was held on August 16, 2024, and the presentation from this meeting is available [here](#). Please note that there is a distinct process for RoLR providers regulated by the Alberta Utilities Commission.<sup>1</sup>

The next meeting will be held virtually on Tuesday, September 3, 2024, from 8:00 to 9:30 a.m. MT. To register, please contact the MSA at [MSAStakeholderConsultation@albertamsa.ca](mailto:MSAStakeholderConsultation@albertamsa.ca).
