Date: April 15, 2013

Re: MSA Compliance Process Revision

The MSA is publishing a revision of its [Compliance Process](#) document in order to reflect changes to certain ISO rules referenced in the process document. The MSA has also taken this opportunity to implement version control tables at the front of the document. These tables are intended to be adopted in due course across all MSA procedure documents and are intended to clarify document changes from one version to the next.

We trust this will be of assistance.

Yours truly,
