

The Market Monitor

WATCHING THE MARKET : your fact source

Week Ending April 5, 2008

Weekly Highlights

For the week ending April 5, 2008, **Pool Price** averaged \$141.24/MWh and ranged from a minimum of \$26.84/MWh in HE03 on Saturday to a maximum of \$699.99/MWh in HE11 on Friday. **Demand** reached a high of 8638 MW in HE10 on Monday and a low of 7096 MW in HE04 on Saturday. Average demand for the week was 7908 MW. **Pool Price** and **Demand** were positively correlated last week with an R-squared value of 0.05.

Coal Unit Availability averaged 4656 MW last week. This is an equivalent availability of 78%. **Gas, Hydro and Other Unit Availability** averaged 3525 MW last week, which is an equivalent of 72%. **Wind Generation** averaged 160 MW last week. This is an equivalent availability of 32%. Availability numbers are based on MW offered into the energy merit order.

Alberta was a net importer from **BC** last week with total imports equal to 33,484MWh. Alberta was a net importer from Saskatchewan last week with total imports equal to 22,139 MWh. Overall, Alberta imported 55,623MWh of electricity last week.

Pool Prices were generally higher than prices in **Mid-C** and higher than prices in **Minn Hub** last week. **Mid-C** prices averaged \$89.08/MWh on-peak and \$83.18/MWh off-peak. **Minn Hub** prices averaged \$73.37/MWh on-peak and \$36.03/MWh off-peak.

Prices in \$CDN at an exchange rate of 1.02311

The average **AECO-C Gas Price** last week was \$8.43/GJ and ranged from a minimum of \$7.91/GJ to \$8.93/GJ. Prevailing gas prices resulted in market heat rates ranging from a low of 11.52 GJ/MWh to a high of 36.90 GJ/MWh. The average market heat rate for the week was 16.86 GJ/MWh.

Alberta's Market Surveillance Administrator is in place to monitor the fair, efficient and openly competitive operation of all electricity markets within the province. The **Market Monitor** is a weekly publication by the MSA intended to educate industry participants and the public on market activities for the previous week. Any questions regarding the material in this publication should be directed to MSA staff. Our contact information is available on the MSA website: www.albertamsa.ca

Wholesale Market

The price duration curves show the % of time that prices were at or below a certain value during the week. For the week ending April 5, prices were at or below:

- \$20/MWh 0% of the time
- \$50/MWh 2% of the time
- \$100/MWh 65% of the time
- \$250/MWh 88% of the time
- \$500/MWh 95% of the time

The heat rate duration curves show the % of time that the implied market heat rate was at or below a certain value during the week. For the week ending April 8 implied market heat rates were at or below:

- 5.0 GJ/MWh 2% of the time
- 10.0 GJ/MWh 36% of the time
- 15.0 GJ/MWh 78% of the time
- 20.0 GJ/MWh 83% of the time

Market Share Statistics

By Fuel Type:

Legend: Coal (Grey), Gas - Cogen (Pink), Gas - Other (Light Blue), Hydro (Dark Blue), Other (Green)

By Submitting Customer:

Last week, coal units were responsible for 62.4% of the generation in the province and set price 25.7% of the time. Gas-cogen units accounted for 28.0% of the generation and set price 55.6% of the time last week while other gas units made up 5.1% of generation and set price 17.9% of the time.

A total of 11 market participants set price last week. No market participant set price more than 20% of the time last week. The top price setter set price 19.6% of the time and the top five price setters set price a total of 71.6% of the time.

Interties

BC import capacity was 53% utilized last week while BC export capacity was 5% utilized. Energy was being imported into Alberta over the BC tie-line 79% of the time and exported out of Alberta over the BC tie-line 18% of the time last week. There was no activity on the BC tie-line 3% of the time last week.

Note: External reserve contract volumes have been subtracted from the BC import ATC as this capacity is not available to import energy into Alberta.

Saskatchewan import capacity was 86% utilized last week while Saskatchewan export capacity was 0% utilized. Energy was being imported into Alberta over the Saskatchewan tie-line 100% of the time and exported out of Alberta over the Saskatchewan tie-line 0% of the time last week. There was no activity on the Saskatchewan tie-line 0% of the time last week.

Last week, Alberta spot prices were mostly higher relative to prices in the Pacific Northwest as represented by Mid-C index prices, supporting import activity across the Alberta - BC interconnection.

Alberta prices were generally higher than prices in MAPP as represented by spot prices at the Minnesota Hub, which generally supports import activity across the Alberta - Saskatchewan interconnection.

Note: Platt's day-ahead strip prices used in energy through BC and SK graphs.

Tie-Line Market Shares

Last week, there were a total of 11 importers. The most active importer had a market share of 52.6% while the second most active importer had a market share of 34.6%. There were a total of 5 exporters last week. The most active exporter had a market share of 45.5% while the next largest exporter had a market share of 34.8%.

Note: Market shares are based on the combined activity on both interties.

Ancillary Services Market

Average on-peak prices paid for active ancillary services last week were **\$71.88/MWh**, **\$88.90/MWh** and **\$85.47/MWh** respectively for active **regulating**, **spinning** and **supplemental** reserves.

Active average off-peak prices were **lower** with the exception of off-peak regulating reserves and averaged **\$82.61/MWh**, **\$70.73/MWh** and **\$45.07/MWh** for active **regulating**, **spinning** and **supplemental** reserves respectively.

Weekly average activation prices for stand-by reserves ranged from **\$78.73/MWh** for **off-peak spinning** reserves to **\$330.53/MWh** for **on-peak spinning** reserves.

Weekly average premium prices ranged from **\$7.33/MWh** for **off-peak spinning** reserves up to **\$11.04/MWh** for **on-peak regulating** reserves.

AS Market Shares by Fuel Type

Last week **hydro** units had the largest market share in the **active regulating** reserve market with **74.5%**. In the **active spinning** reserve market, **hydro** units had the leading market share with **38.2%** while in the **active supplemental** reserve market, **hydro** units dominated with a **57.9%** market share.

Coal units dominated the **standby regulating** reserve market with a **47.4%** market share. Leading market share in the **standby spinning** market was held by **coal** units with a **55.0%** market share. In the **standby supplemental** reserve market, **coal** units had the leading market share with **38.4%**.

RRO Procurement

Glossary

- On-Peak Hours**
In Alberta: HE08 through HE23, Monday through Saturday (prevailing Mountain time)
In Mid-C: HE07 through HE22, Monday through Saturday (prevailing Pacific time)
In Minn Hub: HE08 through HE23, Monday through Sunday (prevailing Central time)
- Off-Peak Hours**
In Alberta: HE01 through HE07 + HE24 (of the same day), Monday through Saturday + HE01 through HE24 Sundays + holidays (prevailing Mountain time)
In Mid-C: HE24 (of the previous day) through HE07 (of the day in question), Monday through Saturday + HE01 through HE24 Sundays + holidays (prevailing Pacific time)
In Minn Hub: HE24 (of the previous day) through HE07 (of the day in question), Monday through Sunday (prevailing Central time)
- ATC**
A measure of the maximum energy flow possible in one direction across an intertie.
- Market Heat Rate**
The prevailing Pool price divided by the prevailing gas price.
- Sparks spread**
Sparks spreads give an indication of the revenue available to cover costs after fuel costs have been paid. A positive spread indicates it is more economical to buy gas and generate electricity while a negative spread indicates it is more economical to buy electricity from the grid.
